

GUIDE FOR AUTHORS

Proceedings of the Zoological Institute RAS (**Proceedings ZIN**) is a peer-reviewed journal (the list of the Higher Attestation Commission for doctoral and candidate theses) publishing original papers in all fields of zoology (systematics of animals and faunistics; distribution and abundance of animals; ecology of animals; anatomy and morphology of animals; physiology, higher nervous activity and behaviour of animals; ethology of animals; embryology of animals; paleozoology and evolution of animals; protozoology; protistology; invertebrate zoology; helminthology; entomology; ichthyology; herpetology; ornithology; theriology), as well as parasitology and hydrobiology. The periodical version of Proceedings ZIN succeeds the serial publication of the same name.

Language of publications: English.

No page charges, free PDFs for authors.

Published by Zoological Institute of the Russian Academy of Sciences as periodical since 2008 (volume 312).

Proceedings ZIN is indexed by Scopus (<https://www.scopus.com/sourceid/21101040217>) and included in the Russian Science Citation Index of Web of Science (<https://clarivate.com/webofsciencigroup/solutions/webofscience-russian-citation-index/>)

Journal List of Russian Science Citation Index – <https://elibrary.ru/projects/rsci/rsci.pdf>

Review papers are accepted only with a special permission from the Editors. Faunistic lists, applied papers and manuscripts on philosophy or history of science are not accepted.

PAPER SUBMISSION

1. Submission of the manuscript implies that it has not been published before nor is being considered for publication elsewhere.

2. Manuscript length is limited to 50000 characters (without spaces), figures and tables not included. Larger manuscripts can be accepted only with a special permission from the Editors.

3. The manuscript must be written in English, adhering to grammatical and stylistic norms and conforming to language standards accepted in academic publications. Authors whose first language is not English are strongly encouraged to seek assistance from a proficient English speaker prior to submission. If such assistance is received, it should be acknowledged in the "Acknowledgements" section of the manuscript.

4. The following information should be provided in the cover letter about all authors (where applicable): full name, position in the institution where the study was conducted, academic degree, academic title, and email address.

5. All papers are reviewed by two anonymous referees, at least one of which is external (i.e., not an employee of the institute). The authors must provide at least two potential referees with their full names, affiliations and email addresses and may indicate undesirable referees.

6. Manuscript should be submitted via e-mail as an electronic document. The author is responsible to send the corrected version within three months of the review process. At the expiration of this period the manuscript is considered rejected.

ADDRESS FOR SUBMISSION

Email: trudyzin@zin.ru

Page proofs (pdf file) will be sent to the corresponding author and have to be corrected within three working days of receipt.

REPRINTS

The corresponding author receives the PDF-file of the paper. Author(s) are free to use this PDF for noncommercial purposes, i.e. to print it, send copies to colleagues, and post it on other websites.

MANUSCRIPT PREPARATION

The electronic version of the manuscript excluding tables and figures, must be prepared as a Microsoft Word file (.doc or .docx). When preparing the text, authors must use font type Times New Roman, font size 12, and line spacing 1.5. Paragraphs should be separated by an empty line space and their starting lines should not be indented. The text should be left-aligned, with no hyphenation, and all pages including references and figure legends should have continuous line numbering. Footnotes are not allowed. The manuscript should contain the e-mail addresses of affiliated organizations (if available). In the manuscripts containing more than 15 000 characters (without spaces), the abstract must not be shorter than 200 words and must not exceed 300 words. In shorter manuscripts, the abstract may contain less than 200 words. The title of the article, authors' names and initials, affiliations, and the abstract must also be provided in Russian (See "Format for submitted manuscripts" for reference). If the author(s) are not proficient in Russian, the Editorial Board will take responsibility for translating the relevant sections of the manuscript into Russian.

Recommended abbreviations and terms. The name of Zoological Institute of the Russian Academy of Sciences should be abbreviated (when necessary) as ZIN. The name of Saint Petersburg should not be abbreviated. Russian administrative units "Kray", "Oblast" and "Rayon" should be given as "Territory", "Province" and "District", respectively.

Taxonomic manuscripts. The authors must strictly follow the latest edition of the International Code of Zoological Nomenclature. The first occurrence of any taxon in the manuscript should include the author's name and the year of its description. For multi-authored taxa, the last author must be separated by the Latin conjunction "et": e.g., *Jaculus turkmenicus* Vinogradov et Bondar, 1949. It is recommended to abbreviate the following occurrences of generic and subgeneric names. If a sentence begins with a species name, the genus name should be spelled out in full. If the manuscript contains descriptions of new taxa, the author should indicate the museum or the institutional collection where the type or the type series is deposited, as well as the registration numbers of the type specimens. The preferred place for deposition is ZIN. Names of species and genera should be given in italics. Authors should clearly indicate their intention to describe a new taxon or propose a nomenclatural change by using the appropriate Latin abbreviations (sp. nov., gen. nov., fam. nov., syn. nov., comb. nov.). These abbreviations should not be separated from the name of the taxon by a comma. Examples of manuscript formatting are provided in the section "Format for submitted manuscripts." The authors must strictly follow this form of presentation. The abstract of a taxonomic manuscript must accurately reflect the taxonomic changes proposed.

REFERENCES

All citations in the text should be formatted as follows: one author – Gorokhov (1995) or (Gorokhov 1995); two authors – Gorokhov and Ivanov (1999) or (Gorokhov and Ivanov 1999); three or more authors – Gorokhov et al. (1998) or (Gorokhov et al. 1998). Papers by the same author(s) published in the same year should be distinguished by the letters a, b, c, etc. If papers have the same senior author and year of publication but different sets of two or more junior co-authors, they should also be marked with the letters a, b, c, etc., both in the text and in the reference list, for example: Gorokhov et al. (1998a, 1998b) or (Gorokhov et al. 1998a, 1998b). In the case of multiple citations, papers must be arranged chronologically and alphabetically within each year (e.g., Gorokhov et al. 1998; Averianov et al. 2005; Mironov et al. 2005). Papers may be cited "in press" only if this status has been demonstrated to the Editors. Papers that have not been accepted for publication (i.e., submitted or under review) cannot be included in the reference list and must instead be cited either as "unpubl." or as "pers. comm." (e.g., V.B. Sukhanov, pers. comm.).

In the reference list, author(s), year of publication, volume and issue numbers (when volume is absent) should be given in bold. When the volume is present, the issue number should be given in parentheses in regular type and is not separated from the volume number by a space. Volume and issue numbers are always given in Arabic numerals. Italics are used for titles of periodicals or serial publications. Pages of publications are always given at the end of references after a colon, except for monographs, dissertations, and abstracts of theses, in which pages should follow a comma: 150 p. (regardless of the original language of the cited publication). Use

an en dash (–) rather than a hyphen for page interval. See “Format for submitted manuscripts” for examples of citation.

The DOI must be specified for all sources that currently have this identifier. The DOI hyperlinks should begin with <https://doi.org/>; make sure that the hyperlinks are valid, they should lead to the webpages of the publications they reference.

The EndNote style for formatting the reference list is available at the following address: https://www.zin.ru/journals/trudyzin/doc/Proceedings_ZIN.ens.

TABLES

Each table, even if the manuscript has only one table, should be numbered with an Arabic numeral (e.g., “Table 1”) and provided in a separate file (.doc or .docx). The widths of tables should not exceed 164 mm in portrait orientation or 214 mm in landscape orientation; the smallest font size allowed is 8 pt. In the text, the tables should be referred to as “Table.”

FIGURES

All illustrations should be in raster graphics in Bitmap, Grayscale or RGB (CMYK) modes or in vector graphics. Figures should be referred to in the text as “Fig.” or “Figs” and numbered (even if there is only one figure) in the order they first appear in the text. The smallest font size allowed is 6 pt. The Arial font is recommended. All illustrative materials should be submitted electronically, fully prepared for publication. Each drawing, photograph, or block of photographs should be submitted as a separate file (ai or LZW-compressed tif). The file name should include the figure number: “Fig1.tif”. The print size of a drawing, photo, or block of photos should not be wider than 79 mm (column) or 164 mm (page) and not exceed 214 mm in height. The resolution for black-and-white figures should be 1200 (Bitmap), and for photos 450 (Grayscale, RGB and CMYK) dpi. Colour illustrations are acceptable; however, authors should note that in the hard copy they may be printed in black and white (but appear in color in PDF).

Two options of figure numbering are acceptable (at the authors’ discretion): 1) continuous (with Arabic numerals), when each figure in a block is numbered as Fig. 1, Fig. 2 (Fig. 1, Fig. 2) etc.; 2) individual, when each block of figures is numbered, but individual figures are designated by capital Latin letters: Fig. 1A–C (Fig. 1A–C).

COPYRIGHT

All rights on submitted manuscripts belong to ZIN and author(s).

FORMAT FOR SUBMITTED MANUSCRIPTS
